DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19,21-36 are allowed.
2. The following is an examiner's statement of reasons for allowance: in the environment of a meter reading unit configured to read meter information provided by one or more utility meters comprising a multiplexer for selecting meter information provided by the first of one or more utility meters, wherein the selection is based on identification information stored in a first memory provided in control information from a remote control system. The closest prior art Sosa Quintanna et al '704 teaches using a customer's identification code to access utility data via a selection of a multiplexer. Sosa Quintanna teaches away from the identification information being stored in a first memory (see col 9, lines 8-11).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Argyroudis '758. Gordon '837, Bruner et al '068 and Wensley

'458 disclose receiving meter data from a plurality of utility meters and sending this data to a remote location.
